DASH DISASSEMBLY INSTRUCTIONS

1. Gently pry off plastic trim caps on left and right of vent.
2. Remove one screw from behind each cap.
3. Gently pry off plastic bar above radio.
4. Remove two screws from behind bar.
5. Pull top of dash trim outward and upward.
6. Remove four screws securing radio to dashboard.
7. Disconnect all electrical connections.

RADIO & KIT INSTALLATION INSTRUCTIONS

SHAFT RADIOS

1. Compare radio shaft spacing to shaft openings in kit faceplate. Use a screwdriver or nut driver and snap out the necessary opening. See Fig. 1 below.
2. Mount radio to kit/faceplate using knobs, trimplate, shaftnuts, washers, and spacers supplied with radio. Adjust the nosepiece so it is flush with the front of the trimpanel.

DIN RADIOS

1. Remove shaft slide plates by pushing to the center of the radio opening. See Fig. 2.
2. Insert DIN sleeve from your new radio into the installation kit. See Fig. 3 below
3. Depress the tabs from inside the sleeves opening upward, outward, and downward to secure sleeve to the installation kit.
4. Install radio into sleeve and lock into place.

EQUALIZERS

NOTE: IF AN EQUALIZER IS NOT BEING USED, SNAP TRIMPLATE INTO PLACE AND PROCEED TO WIRING INSTRUCTIONS.

1. Place equalizer into opening and secure to mounting frame using hardware supplied with equalizer.

WIRING

Radios Only

Follow wiring instruction supplied with radio. Test radio/speakers. If you wish to keep the factory wiring intact, a wiring harness may be purchased.

(American Intertional part# NWH-700)

Radios AND EQUALIZERS

Follow wiring instruction supplied with radio and equalizer. Test radio/speakers. If you wish to keep the factory wiring intact, a wiring harness may be purchased.
